## Government Services

### Physical Scientist

Perot Systems Government Services (PSGS), a contractor to the National Oceanic and Atmospheric Administration (NOAA) Coastal Services Center (Center), seeks an individual to serve as a Physical Scientist to support the Center's Coastal Remote Sensing (CRS) program.

The successful candidate will be an innovative, team leader responsible for project management, leadership and coordination in the context of remote sensing for natural coastal hazards. Technical experience required includes knowledge of coastal hazards and risk assessment with background in the use of remote sensing as it applies to coastal hazards and emergency management. Knowledge of Light Detection and Ranging (LIDAR) and other high-resolution topographic / bathymetric (elevation) modeling technologies is important. Specific responsibilities of this position include the coordination of CRS projects designated as 'hazards' projects with other CSC, NOAA, and external agencies' hazards-related activities.

Located in Charleston South Carolina, the NOAA Coastal Services Center serves the nation's coastal resource management community by facilitating access to and utilization of the most up-to-date information, management strategies, and technology. For more information visit the Center's Web site at: [www.csc.noaa.gov](http://www.csc.noaa.gov)
